## Kreatives Technologies

Software Developer

Bujumbura Mairie, Burundi

Jun 2016 – Sept 2016, Internship

Under the guidance and support of my mentor and supervisor, I undertook a project for my final studies titled "Design and Implementation of a Web Application for the Management of Classified Ads and Internal Messaging." The project encompassed the following key responsibilities and achievements:

- Conceptualized and designed the web application, focusing on user-friendly interfaces and efficient data management.
- Developed the application using PHP, JavaScript, HTML, and CSS, ensuring functionality and responsiveness.
- Implemented features for classified ad management, including user posting, search, and categorization.
- Integrated an internal messaging system to facilitate seamless communication among users.
- Conducted thorough testing, debugging, and optimization to ensure the application's reliability and performance.

## SKILLS

---

**Programming:** Python, PHP, Kotlin (Android development), NodeJs, JavaScript, R, SQL, C#, Git, Docker

**Frameworks:** Django, Laravel, VueJs, ASP.NET

**Developer Tools:** Postman, Visual Studio, Visual Paradigm
